Shasta County - Redding GW Basin

Maximum Increase GWE (ft)	0.3
Maximum Decrease GWE (ft)	NA
Average Change GWE (ft)	0.3
Average Well Depth (ft)	917
Number of Wells Monitored	1

Tehama County - Redding GW Basin

Maximum Increase GWE (ft)	2.9
Maximum Decrease GWE (ft)	-1.7
Average Change GWE (ft)	0.6
Average Well Depth (ft)	747
Number of Wells Monitored	3

Tehama County - Sacramento Valley GW Basin

Maximum Increase GWE (ft)	5.3
Maximum Decrease GWE (ft)	-5.7
Average Change GWE (ft)	-1.6
Average Well Depth (ft)	893
Number of Wells Monitored	15

Glenn County - Sacramento Valley GW Basin

Maximum Increase GWE (ft)	NA
Maximum Decrease GWE (ft)	-28.1
Average Change GWE (ft)	-9.7
Average Well Depth (ft)	986
Number of Wells Monitored	23

Colusa County - Sacramento Valley GW Basin

Maximum Increase GWL(ft)	NA
Maximum Decrease GWE (ft)	-36.5
Average Change GWE (ft)	-11.3
Average Well Depth (ft)	799
Number of Wells Monitored	7

Butte County - Sacramento Valley GW Basin

Maximum Increase GWE (ft)	2.4
Maximum Decrease GWE (ft)	-14.6
Average Change GWE (ft)	-5.8
Average Well Depth (ft)	847
Number of Wells Monitored	20

Summary Results for Summer 2014 to Summer 2015 Change in Groundwater Elevation

Maximum Increase GWE (ft)	5.3
Maximum Decrease GWE (ft)	-36.5
Average Change GWE (ft)	-6.4
Average Well Depth (ft)	895
Number of Wells Monitored	69

NOTES

Note 1: A positive number indicates that groundwater elevations were higher in the current year than in the previous year. A negative number indicates that groundwater elevations were lower in the current year than in the previous year.

Note 2: Statistical analysis is based on the number of wells monitored within each county. Summary results are based on the total number of wells monitored, not averages of the statistical analysis of individual counties.

Note 3: This map may not use all the color ranges shown in table above. Some wells may not be visible on map due to the close proximity to each other.

Note 4: Groundwater level changes are based on groundwater level measurements taken from wells constructed in the deep aquifer zone at similar dates of different years. These wells include those that have depths that are greater than 600 ft.

Note 5: Change in groundwater elevations are based on the actual measured levels of the hydrostatic level (piezometric surface) of the groundwater at individual well locations.Contoured color ramping is interpolated from these measurements and should be considered approximate. The accuracy of the estimated contour is directly related to the timing of the measurements, spacing and the distribution of nearby monitoring wells, well construction, and aquifer characteristics.

Note 6: GWE - Groundwater Elevation
bgs - below ground surface
