Shasta County - Redding GW Basin	
Maximum Increase GWE (ft)	NA
Maximum Decrease GWE (ft)	-1.9
Average Change GWE (ft)	-1.9
Average Well Depth (ft)	790
Number of Wells Monitored	2

Tehama County - Redding GW Basin	
Maximum Increase GWE (ft)	NA
Maximum Decrease GWE (ft)	-2.0
Average Change GWE (ft)	-2.0
Average Well Depth (ft)	865
Number of Wells Monitored	1

Tehama County - Sacramento Valley GW Basin	
Maximum Increase GWE (ft)	1.2
Maximum Decrease GWE (ft)	-3.7
Average Change GWE (ft)	-1.4
Average Well Depth (ft)	846
Number of Wells Monitored	15

Glenn County - Sacramento Valley GW Basin	
Maximum Increase GWE (ft)	8.9
Maximum Decrease GWE (ft)	-10.5
Average Change GWE (ft)	-2.4
Average Well Depth (ft)	908
Number of Wells Monitored	27

Colusa County - Sacramento Valley GW Basin	
Maximum Increase GWL(ft)	NA
Maximum Decrease GWE (ft)	-3.1
Average Change GWE (ft)	-2.2
Average Well Depth (ft)	906
Number of Wells Monitored	11

Butte County - Sacramento Valley GW Basin	
Maximum Increase GWE (ft)	1.2
Maximum Decrease GWE (ft)	-4.7
Average Change GWE (ft)	-1.6
Average Well Depth (ft)	881
Number of Wells Monitored	15

Change in Groundwater Elevation

- Greater than 8 feet higher
- > 6 to 8 feet higher
- > 4 to 6 feet higher
- > 2 to 4 feet higher
- 0 to 2 feet higher
- > 0 to 2 feet lower
- > 2 to 4 feet lower
- > 4 to 6 feet lower
- > 6 to 8 feet lower
- Greater than 8 feet lower

Summary Results for Spring 2011 to Spring 2012 Change in Groundwater Elevation	
Maximum Increase GWE (ft)	8.9
Maximum Decrease GWE (ft)	-10.5
Average Change GWE (ft)	-2.0
Average Well Depth (ft)	885
Number of Wells Monitored	71

NOTES

Note 1: A positive number indicates that groundwater elevations were higher in the current year than in the previous year. A negative number indicates that groundwater elevations were lower in the current year than in the previous year.

Note 2: Statistical analysis is based on the number of wells monitored within each county. Summary results are based on the total number of wells monitored, not averages of the statistical analysis of individual counties.

Note 3: This map may not use all the color ranges shown in table above. Not all wells will be visible on map due to the close proximity to each other.

Note 4: Groundwater level changes are based on groundwater level measurements taken from wells constructed in the deep aquifer zone at similar dates of different years. These wells include those that have screened intervals and well depths that are generally greater than 600 ft.

Note 5: Change in groundwater elevations are based on the actual measured levels of the hydrostatic level (piezometric surface) of the groundwater at individual well locations. Contoured color ramping and change in groundwater elevation estimates between monitoring wells is a computer generated calculation based on the inverse distance weighted method using the availability and proximity of surrounding monitoring well measurements. As such, the calculated change in groundwater elevation between individual monitoring wells should be considered approximate. The accuracy of the estimated contour is directly related to the spacing and the distribution of nearby monitoring wells, the similarity of nearby monitoring well construction, and the local changes or similarities in aquifer characteristics.

Note 6: GWE - Groundwater Elevation
bgs - below ground surface
