Analysis report

Regular sampling (file the water) and storing current conditions to monitor and compare quality(changing) over the time (water is a memory).

To achieve highest sustainable water quality appreciation goal. Will activate Regional water cycle consciousness planet memory DNA.

-Our concern is to improve and maintain high quality.

Addition Draft considering to include:

-to redefine groundwater usage fees categories 2016-2017:

1A)Drinking, 1b fruits and nuts,

1c vegetables and crops : (benefits rain conserved)

2) bottling industry and drinking fountains

3) house (shower sink) benefits converting rain and river filtrated water.

4) industry (a)food

5)

- To prohibit groundwater grass irrigation - consider penalty.

5) 7) house (toilets +premium to convert recycle - storm filtrated water)

We appreciate us

We are One Water
