Stormwater Flood Management Grant Proposal
City of Redwood City
Economic Analysis – Water Supply Costs and Benefits

Attachment 8 consists of the following items:

- ✓ **Water Supply Costs and Benefits.** Attachment 8 provides estimates for the water supply costs and benefits of the proposed project.

Introduction

This attachment contains estimations of the water supply-related costs and benefits of the proposed project.

Benefits

This project would not result in quantifiable and/or monetized water supply benefits. Detailed cost and benefit information associated with the Project, including present value calculations, is provided in Appendix 7-1.

Table 8-1: Benefits Summary

Type of Benefit	Assessment Level	Beneficiaries
Water Supply Benefits		
Not Applicable	Not Applicable	Not Applicable

Table 8-2: Benefits-Cost Analysis Overview

	Present Value (\$2009)
Costs – Total Capital and O&M	\$12,715,552
Monetizable Benefits	
Not Applicable	Not Applicable
Qualitative Benefits	Qualitative Indicator*
Not Applicable	Not Applicable

*Magnitude of effect on net benefits

+/- (negligible or unknown); + (moderate); ++ (significant positive); - (moderate negative); --
