Carl A. Torgersen
Deputy Director
Department of Water Resources

The Department of Water Resources (DWR) is adjusting its projection for meeting the State Water Project (SWP) contractors' 2013 Table A requests.

DWR is reducing its projected delivery capability from 1,668,958 acre-feet to 1,460,342 acre-feet. This reduction equates to a drop in allocations from 40 percent to 35 percent for long-term SWP contractors. Enclosed is the revised 2013 SWP Allocation Table.

This decrease is primarily due to the well below average statewide snowpack and precipitation. DWR will continue to monitor the situation and may revise the allocations if warranted by the year's developing hydrologic and water supply conditions.

Based on this updated allocation, DWR will use the contractors' current 40 percent delivery schedules in developing new schedules, unless revised schedules are submitted. DWR will send an approved monthly water delivery schedule to each long-term contractor in April.

If you have any questions or need additional information, please contact Robert Cooke, Chief of DWR's State Water Project Analysis Office, at (916) 653-4313.
