Subject: indicator of crop evapotranspiration

Kamyar,

Per your request, I have written a page on the indicator for crop evapotranspiration. I have no knowledge of the extent of your technical background, so I wrote at an elementary level. I have also attached a power point that will provide more information. Please feel free to email me any further questions.

I have cc'd Dr. Allen, who would probably like to know his group's work is being discussed, and who will likely correct my mistakes.

Regards,
Bob Siegfried
